Preview & Remote App for mobile devices:
For the iOS system, please scan this QR Code to access the Apple App Store to download and install "SYVR360".

or for the Android system, please scan this QR Code to get access to the Google Play store to download and install "SYVR360".

Quick start guide
1. Install SD card:

Insert the Micro SD card into the slot as indicated, as shown on the right. Please ensure the pins on the memory card are facing upwards as shown.

Important:

- To ensure smooth operation and file transfer, a high-speed Micro SD card between Class 6~Class 10 is recommended.
- Always turn off the camera before inserting or removing the memory card.

2. Power-on/off

Power-on: Press and hold the Power button for about 2 seconds and release when you hear a beep. The display screen will be appear as shown below, indicating the product is ready to use (the default mode after powering on is Video Recording mode).

Important:

- If the camera fails to turn on please charge the camera , ensuring that the blue indicator lights up during charging as this confirms that the product is being charged.

Power-off: Press and hold the Power button for about 3 seconds and release. The Display will display "GOODBYE" and turns off. Please note that the camera has a power save mode which is set to automatically turn the camera off after 3 min. of no operation. This can be adjusted or deactivated in the settings menu.

4

3. Charging

Please use the data cable included in the product pack to charge the camera from a laptop or desktop computer. During charging, the indicator displays in blue and lights constantly; when charging is completed, the blue indicator turns off.

Important:

■ If other chargers are used, please ensure the output power is within the following range before use: 5V/0.5A ~ 5V/2.0A.

4. Recording or shooting

This camera has a **Recording** (video) mode and a Shooting (photo) mode. After turning on, quick press the MODE (Power button) to switch between different modes, and the corresponding mode icon will be displayed on the screen. (a beep will confirm your button press)

Video: In Recording mode, press the Shutter button to start recording. The display screen displays the elapsed video recording timing.
After reaching a max. video recording time of 29 minutes the camera will automatically stop. It can only be restarted manually.

```

2. Using a PC or laptop computer for playback

You may use your PC or laptop as an alternative playing experience, or to edit and share videos. It can be completed by following the steps as shown below:

Download the SYMAX360 Player:

www.easypix.info/download/symax360.zip

*Please note that the use of any other software to view images captured with your camera will result in images being incorrectly displayed as below.

Download video or picture onto PC:

■ Use the USB data cable included with your camera to connect the camera and computer. After connection, the camera display screen will display "MSDC".

MSDC

■ Open "My computer" to select "VIDEO" OR "JPG" folder under "Removable disks". Select the file to be downloaded and download it into location specified on PC.
Run SYMAX360 Player:
Open your chosen 360º photo or video using this player.

Playback video with SYMAX360 Player:
When playing the video, use the mode icons in the top right corner to select the different playback views. (Plane/Planet/Invert). Clicking these icons will select the different effects. While playing, place the mouse over the image and click to move around within the 360º panoramic image.

Sharing videos online:
Before sharing your 360º panoramic videos on social media sites such as Facebook and You Tube your videos must be converted to a compatible format in order to be viewed properly online.
Please use the conversion tool included in the desktop app to complete this process.

Important:

On current video websites, the videos uploaded by users have been compressed automatically. This may lead to a difference in the appearance of video playback between videos viewed online and on your computer.
